

Client: Cadassist

Industry: Design & Data
Management

Cadassist

“With this product we’ve gone from a 4-6 hour deployment window to less than 1 hour to deploy individual machines; creating images also takes less than half the time which frees our technical staff to work on other projects.”

“The service from 101 Data Solutions has been excellent and beyond reproach.”

Ali Haque
Technical Co-Ordinator
Cadassist

Challenge

Cadassist are a leading design and data management software integrator who support an impressive list of clients with their range of products and services. Cadassist recently challenged themselves to change their software image deployment method to improve efficiency and adopt a more robust process.

Solution

101 Data Solutions proposed and supplied an Acronis Snap Deploy solution, which met Cadassist’s need for rapid bare-metal deployments to large numbers of PCs and servers as well as effortless on-going redeployment for similar future projects. Using Acronis Snap Deploy Cadassist now redeploy images to multiple live Windows Machines at the same time, eliminating the need for manual booting of individual systems. 101 Data Solutions provided proof of concept software and services before purchase, enabling the customer to make an informed technical and strategic decision without any initial commercial outlay.

Results

- Machine deployment window was reduced from 4 – 6 hours to less than 1 hour for individual machines
- Cadassist now provision all their workstations together as if provisioning just one, and create images of any standard configuration they choose (including the OS, configuration, files, and all applications) in less than half the time it took previously.

Acronis

Acronis is a leading backup software, disaster recovery, and secure data access provider to consumers, small-medium businesses, and enterprises. Acronis solutions include physical, virtual, and cloud server backup software, storage management, secure file sharing, and system deployment. Powered by the Acronis AnyData Engine, Acronis products provide easy, complete, and safe solutions for data in local, remote, cloud, and mobile devices. When it comes to new generation data protection, Acronis is the undisputed leader.

Manage Data Better with 101 Data Solutions

101 Data Solutions can help you with managing data better. We look at the root cause of your data issues and apply our knowledge and products to help you with business efficiency.

Our UK wide network of fully accredited and experienced Data Storage experts work hard to offer the right solution for your business. With a full range of installation, project management and support services across all of our products, we offer industry leading solutions suitable to your technology and business needs.
