Administrator**  
Rushes

## Challenge

Rushes prides itself on its state-of-the-art equipment and HD capable edit suites, and works with the highest technical applications. As part of its leading edge proposition, Rushes identified a need to implement a network solution which would deliver higher performance and had less risk of downtime.

## Solution

101 has installed a network of 10Gbit low latency Brocade VDX 6720 ethernet switches as part of a virtual chassis solution. The team installed 30 units around the network which would be managed via one switch through a central point. The installation of the Brocade units in this way removed the necessity for the Rushes team to manage each one separately.

## Results

- Improved network utilisation
- Maximised application availability
- Increased scalability and simplified network architecture.

## Brocade

Founded in 1995, Brocade is an industry leader in providing reliable, high-performance network solutions that help the world's leading organizations transition smoothly to a virtualized world where applications and information reside anywhere.

Today, Brocade is extending its proven data center expertise across the entire network with future-proofed solutions built for consolidation, network convergence, virtualization, and cloud computing.

## Manage Data Better with 101 Data Solutions

101 Data Solutions can help you with managing data better. We look at the root cause of your data issues and apply our knowledge and products to help you with business efficiency.

Our UK wide network of fully accredited and experienced Data Storage experts work hard to offer the right solution for your business. With a full range of installation, project management and support services across all of our products, we offer industry leading solutions suitable to your technology and business needs.
