

Client: University of Bangor

Industry: Higher Education

“We put a considerable amount of time and effort into selecting the storage solution that was right for our needs, it is therefore logical that the same importance is placed on ensuring the supplier is also the right fit for our needs. If organisations don’t take this approach throughout every step of their IT purchases, vital funds could be wasted.”

**Technical Director
University of Bangor**

Challenge

As universities grow, so does their need for data storage. This is something that The University of Bangor was only too aware of when it set out to find the best solution for its individual needs. The university learnt that through thorough research, it was able to secure the best price and value for its storage infrastructure.

Solution

Through a tender process the educational institution opted for the EMC Celerra NS20 storage solution architected by 101 Data Solutions. The NS20 helps companies attain the maximum value from its information, at the lowest TCO, at every point in the information life cycle.

Results

- Comprehensive DR Policy achieved through array based replication.
- Highly Scalable system to deal with current and future growth
- World leading technology at an affordable price through EMC to address the TCO argument.
- Unified architecture in a single system to address Block and File level storage.

EMC

EMC is a global leader in enabling businesses and service providers to transform their operations and deliver Information Technology as a service. Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments to store, manage, protect and analyze their most valuable asset — information — in a more agile, trusted and cost-efficient way.

Manage Data Better with 101 Data Solutions

101 Data Solutions can help you with managing data better. We look at the root cause of your data issues and apply our knowledge and products to help you with business efficiency.

Our UK wide network of fully accredited and experienced Data Storage experts work hard to offer the right solution for your business. With a full range of installation, project management and support services across all of our products, we offer industry leading solutions suitable to your technology and business needs.
