

Client: Wyke Farms

Industry: Manufacturing

"We looked carefully at a number of partners, but it was only 101 Data Solutions that seemed to really understand our needs and offered solutions that fitted our requirements.

When we need a back-up solution, or we have any issues, a specialist consultant always comes to assess our individual needs. 101 Data Solutions were always on the case straight away."

Pete Hooper
IT and Production Manager
Wyke Farms

Challenge

Somerset-based Wyke Farms is the UK's largest independent cheese producer, operating for 150 years. In recent times the farm has seen cheese-making transform to a streamlined production process. The change in process meant that high quality servers and data storage was needed. The farm also needed an upgrade to their existing security, which had failed to deter break-ins

Solution

101 Data Solutions has installed an Overland Storage SAN solution, creating block and file level storage that is easy to use, as well as providing full functionality, flexibility and scalability. It integrates with Wyke Farms operating systems as well as providing data protection and flexible connectivity. This enables Wyke Farms to easily store the data generated from 20 new high-definition CCTV cameras.

Results

- 101 Data Solutions also provided Wyke Farms with a second package for disaster recovery purposes and to store data generated from the CCTV cameras.
- Pete Hooper says, "The security systems 101 has helped put in place has enabled us to capture high resolution images – which has meant that police have been able to quickly identify and apprehend intruders who have broke in, within just a few days.... it's proving to be the safeguard we were seeking."

Overland Storage

Overland Storage is the trusted global provider of effortless data management and data protection solutions across the data lifecycle. With its vision of effortless data, Overland Storage firmly believes that storage expertise, specialized knowledge, and experience should be built into the storage solution and not demanded from I.T. administrators. Whether distributed data is around the corner or across the globe, Overland has taken the complexity out of data management and protection, making it easy and cost-effective to manage different tiers of information over time.

Manage Data Better with 101 Data Solutions
