SUMMARY

101 Data Solutions have always been very committed when it comes to providing a service for our clients that is reliable and responsive. Successful projects are built on relationship and trust so we ensure the right amount of time and thought is invested in all projects to allow a clear understanding of your requirements which in-turn enables the most positive outcome.

3ᴿᴰ PARTY SUPPORT

Our IT hardware maintenance and support service provides organisations with an independent, OEM alternative for post-warranty IT hardware support on mission-critical, non-critical and disaster recovery IT assets throughout the United Kingdom. Instead of upgrading your IT equipment unnecessarily when the warranty period ends, rely on us to help you get the most from your CAPEX and OPEX with our server maintenance and storage support services.

With highly skilled technical personnel, a sophisticated IT hardware support infrastructure and proprietary support tools, we provide expert support for virtually any IT hardware under one contract, these vendors include: IBM, Dell EMC, HP, Sun / Oracle, NetApp, Hitachi, Fujitsu and Cisco.

INFRASTRUCTURE RELOCATION

101 Data Solutions offers infrastructure relocation services that include planning, design and installation of data and voice network infrastructure at new office premises.

We have the skill set, expertise and most importantly experience to support and assist you with businesses office relocation. We will develop a plan for the relocation of your computers, servers, network, data / voice wiring and other infrastructure equipment. We will help you with provisioning of infrastructure and onsite implementation management – aspects that are vital to a successful relocation plan to a new office space. We can offer comprehensive insurance so you can rest assured the relocation is in the safest of hand.

TECHNOLOGY HARDWARE DISPOSAL

As experienced technology professionals, we know what is required to safely, professionally and ethically recycle your IT equipment. We are fully WEEE compliant and offer a secure data destruction service to keep your mind at ease. Using the latest data erasure standards, we can offer ISO compliant certification as part of our recycling process.

PENETRATION TESTING

101 Data Solutions can supply Crest accredited penetration testing services. This includes a detailed analysis of the target systems or networks using a combination of tools and extensive manual methods to enumerate as many network-level flaws as possible in the time available. At 101 Data Solutions, we can help you deliver a cost-effective security testing strategy customized to your exact requirements.
